WhatsApp Messenger: +5491167299200 |

Address: Comandante Mamberti 548, 1824, Argentina (Home)

● ABOUT ME

I am a Full-Stack Developer in training, passionate about technology and programming. My goal is to master both front-end and back-end development, carrying out projects from conception to final implementation. I am constantly learning and adapting to new technologies, with a strong foundation in various technologies. I am excited about the opportunities that await me on my journey to becoming a Full-Stack developer.

Living in "beta" is my approach to life. I constantly seek to improve, adapt, and evolve, just like developing software. I maintain an open mindset, receptive to changes, and always in search of an enhanced version of myself.

● EDUCATION AND TRAINING

01/03/2023 – 04/11/2023 Argentina

FULL-STACK WEB DEVELOPER Argentina Programa 4.0

16/07/2022 – 05/04/2023 Argentina

FULL-STACK WEB DEVELOPER EGG COOPERATION

01/01/2021 – 01/01/2023 Argentina

BACHELOR OF ARTS E.E.S N°4

● LANGUAGE SKILLS

Mother tongue(s): **SPANISH**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
INGLES	C2	C2	B2	C1	C2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

● DIGITAL SKILLS

Framework Spring (Boot, Data, Security, REST, MVC, Thymeleaf) | JUnit Mockito | Web Programming: HTML, CSS, Javascript (front-end), Java (back-end) | Bootstrap 4: Maquetación Responsive y Layout | Database : MySQL(basic)

● ADDITIONAL INFORMATION

PROJECTS

News website

Java - MySQL - HTML5 - CSS3 - Bootstrap - Thymeleaf - Spring - Spring Security - JPA - Maven

This website offers a platform for users to stay informed about the latest news, journalists to share their stories with the world, and administrators to control the website's content. Users can browse current news. Journalists can create accounts to publish news, edit their articles, and collaborate with other journalists. Administrators have access to the tools they need to manage the website, such as creating news and managing users.

Health website "Vitalidapp"

Java - MySQL - HTML5 - CSS3 - Javascript - Bootstrap - Thymeleaf - Spring Framework - Spring Security - JPA - Maven

This web platform helps self-employed doctors to register and care for patients, keep their medical records in an updated database and save diagnoses. The platform solves the current problem in hospitals, where medical records are often lost and there is no clear order. The platform provides a safe and efficient solution for self-employed doctors to manage their patients.

Text encrypter "JavaCrypter"

HTML5 - CSS3 - Javascript

This web platform is a challenge provided by the Alura "ONE" program in conjunction with Oracle. The idea of the challenge is to put into practice what was learned during the program and create an encryptor where the user must be able to enter a text and encrypt it or, if it is already encrypted, decrypt it. It has an aesthetically pleasing design with a unique color palette. It has certain limitations, the user cannot enter texts with special characters, accents, or uppercase letters.
